Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

- 1. (currently amended) A water jet spray device
- 2 comprising a body (1) delimiting a chamber (5) for
- housing a filter (10), the chamber (5) opening, through
- 4 an interposed perforated plate $\frac{15}{15}$, onto a main face $\frac{3}{15}$
- of the body $\frac{(1)}{(1)}$ and, via an opening $\frac{(17)}{(17)}$ which can be
- 6 sealed by a first removable stopper (19), toward a front
- face (4) of the body (1), the perforated plate (15) being
- 8 slidably mounted in a housing (16) which opens, via a
- 9 hole $\frac{(22)}{(21)}$ which can be sealed by a second stopper $\frac{(21)}{(21)}$,
- 10 toward the front face $\frac{4}{4}$ of the body $\frac{1}{4}$, characterized
- 11 in that
- 12 the opening (17) and the hole (22) open into a
- 13 common well formed in the body (1) and provided with a
- 14 complementary opening and with a complementary hole (25)
- 15 facing the opening and the hole respectively,
- a pin (20) is inserted removably into the well
- 17 (18) through bores made in the stoppers so as to retain
- 18 the two stoppers (19, 21) therein in the sealing position
- 19 when it is fully inserted therein.

- 1 2. (currently amended) The device as claimed in
- 2 claim 1, characterized by first means for locking the pin
- 3 (20) in the position in which it retains the two stoppers
- 4 $\frac{(19,-21)}{(19,-21)}$ in the sealing position.
- 3. (currently amended) The device as claimed in
- 2 claim 1 or 2, characterized by second means for locking
- 3 the pin (20) in an intermediate position in which it
- 4 retains the first stopper (19) in the position for
- 5 sealing the opening (17) and stops retaining the second
- 6 stopper $\frac{(21)}{(21)}$ in the position for sealing the hole $\frac{(22)}{(21)}$.
- 1 4. (currently amended) The device as claimed in
- 2 claim 2 or 3, characterized in that the first and second
- 3 locking means consist of respective peripheral grooves
- 4 (28, 29) formed on the outer face of the pin and
- 5 cooperating with a removable finger (30) entering the
- 6 grooves radially.
- 1 5. (currently amended) The device as claimed in one
- 2 of the preceding claims claim 4, characterized in that
- 3 the pin has means for acting on a control (9) of a device
- 4 (8) for supplying the chamber with water so as to allow
- 5 supply only when the pin (20) is fully inserted into the
- 6 well $\frac{(18)}{}$.

- 1 6. (new) The device as claimed in claim 1,
- 2 characterized in that the pin has means for acting on a
- 3 control of a device for supplying the chamber with water
- 4 so as to allow supply only when the pin is fully inserted
- 5 into the well.
